

CS5001 Fall Advisor Feedback Rubric

Project Title: *Print Net*

Advisor Name: *Jeremy Hall*

Team Members: *Mitchell Kosti*

Advisor Signature: *Angela Davis*

Instructions: Please choose one rating for each category (place one 'X' in each highlighted row).

	exemplary	very good	acceptable	poor
Fall Design Report Content	X			
- design decisions and techniques - specifications - diagrams	Design and development process is explained with clarity; high quality computing and software design is evident	Illustration of design and development process provides technical detail and evidence of good computing practices	design and development process is evident but slightly lacking in clarity or quality	design and development process is not clearly illustrated
Design Report presentation	X			
Presentation of goals of project and results to date.	Presentation is well-organized and polished; project aims are clearly explained	Presentation is organized; aims adequately described	Presentation is acceptable but slightly lacking in clarity or detail	Presentation is poorly organized and difficult to follow
Project complexity	X			
	project is challenging and exceeds normal expectations for a capstone project	project has good technical challenges and requires computing and engineering problem solving	project has acceptable scope requiring some technical expertise to solve	project has limited scope and requires little technical expertise or development effort
Creativity and innovation		X		
	team displayed exceptional creativity in design and implementation	team displayed above average creativity in design and/or implementation	team displayed modest creativity in design and/or implementation	team displayed little evidence of creativity in design and/or implementation

Other comments:

- pre-code diagrams are quite small & hard to read → understood that this was on-purpose
- good project complexity
- very clear next phases
- auto download G-code is great
- good design changes
- should Murre & Mohamed have access? might be worth paying for them → no.
- the design sounds like it's very integrated w/ the lab good job!
- good notes on updates during demo
